General Comment:

This is a Final Reclamation and Stormwater inspection for the pit area that had four different pits and the associated access road.

The associated well location (123-19088) passed final reclamation on 12/27/1996- Doc.# 500178622.

Comment:

| | | |
|---|--|---|
| Corrective Action: | Access road- vegetation establishment is in-process but additional reclamation activities would be recommended along the eastern half and would be needed along the western half. Refer to the attached inspection photos. | Date 11/18/2024 |
| | Pit area- the northern half is mostly vegetated and reflective or reference areas; however, the southern half has a higher abundance of annual, weedy vegetation of tumbleweeds and cheatgrass. | |
| Comply with Rule 1004 for the access road and pit area. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management. | | |
| Overall Final Reclamation | Fail | Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/> |
