## Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27.

This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

## OPERATOR INFORMATION

Name of Operator: KERR MCGEE OIL & GAS ONSHORE LP	Operator No: 47120	Phone Numbers
Address: P O BOX 173779		Phone: (970) 515-1110
City: DENVER	State: CO	Zip: 80217-3779

## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	SOILS	40' (N-S) x 20' (E-W) x 4' bgs	Inspection/soil samples/laboratory analytical results

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Tank battery decommissioning activities were completed at the Bryant 9&34-30A O SA production facility location on November 8 and 9, 2023. Groundwater was not encountered during facility decommissioning activities. Visual inspection and field screening of soils at the former production facility infrastructure locations was conducted following decommissioning activities, and 13 soil samples were collected as described in a previous Form 27-Supplemental (Document No. 403666354). The soil samples were submitted for laboratory analysis of the full Table 915-1 analytical suite to determine if a release occurred. Laboratory analytical results indicate that soil impacts are present at sample locations AST-B02@3", SEP1-B01@4', SEP1-B02@4', SEP3-B02@4', SEP4-B01@4', and SEP4-B02@4' due to BTEX, TPH, TMB, and/or PAH concentrations above the ECMC Table 915-1 soil standards. As such, a Form 19 Initial/Supplemental Spill/Release Report (Document No. 403590957) was submitted on November 10, 2023, and the ECMC issued Spill/Release Point ID 485540. Analytical results indicated that the remaining constituent concentrations in the soil samples collected during facility decommissioning activities were in compliance with ECMC Table 915-1 standards and/or within the range of site-specific background levels (x 1.25 for metals). Excavation and site assessment activities to address remaining soil impacts at the former SEP and AST locations are currently on hold due to wildlife stipulations, as this site is located within a Bald Eagle Active Nest Site Half-Mile Buffer. As such, excavation and site assessment activities are expected to be completed after August 1, 2024, and will be summarized in a forthcoming Form 27-Supplemental update.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

On November 8 and 9, 2023, 13 confirmation soil samples were collected from the former SEP, AST, and PWV locations, as described in a previous Form 27-Supplemental (Document No. 403666354). Analytical results indicated that impacted soil was present at 6 sample locations collected from the former SEP and AST locations. Excavation activities to address remaining soil impacts at the former SEP and AST locations have not yet been initiated and will be summarized in a forthcoming Form 27-Supplemental update. Based on the analytical results received to-date and the ECMC-approved analyte list (Document No. 403666354), future confirmation soil samples from the SEP and AST excavation areas will be submitted for laboratory analysis of BTEX, TPH, TMB, PAHs, As, Ba, Cd, Cu, Pb, Ni, Se, and Ag.

### Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Groundwater has not been encountered during the facility decommissioning activities completed to-date. If groundwater is encountered during future impacted soil excavation activities, a minimum of one grab sample will be collected as soon as practical. Groundwater samples will be submitted to an accredited laboratory for analysis of benzene, toluene, ethylbenzene, total xylenes (BTEX), naphthalene, 1,2,4- and 1,3,5-trimethylbenzene (TMB), using standard methods appropriate for detecting the target analytes in ECMC Table 915-1.

### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

## Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

On November 8 and 9, 2023, visual inspection and field screening of soils was conducted as described in a previous Form 27-Supplemental (Document No. 403666354). Excavation and site assessment activities to address remaining soil impacts at the former SEP and AST locations are currently on hold due to wildlife stipulations, as this site is located within a Bald Eagle Active Nest Site Half-Mile Buffer. As such, excavation and site assessment activities are expected to be completed after August 1, 2024, and will be summarized in a forthcoming Form 27-Supplemental update. As such, no additional site assessment or remediation activities have been completed since the previous Form 27-Supplemental update was submitted to the ECMC on May 31, 2024 (Document No. 403798243). As such, no additional screening or sampling results are provided in this document.

# SITE INVESTIGATION REPORT

## SAMPLE SUMMARY

### Soil

Number of soil samples collected 13

Number of soil samples exceeding 915-1 6

Was the areal and vertical extent of soil contamination delineated? No

Approximate areal extent (square feet) 800

### NA / ND

-- Highest concentration of TPH (mg/kg) 523.5  
46

-- Highest concentration of SAR 5.35

BTEX > 915-1 Yes

Vertical Extent > 915-1 (in feet) 4

### Groundwater

Number of groundwater samples collected 0

Was extent of groundwater contaminated delineated? Yes

Depth to groundwater (below ground surface, in feet)

Number of groundwater monitoring wells installed

Number of groundwater samples exceeding 915-1

Highest concentration of Benzene (µg/l)

Highest concentration of Toluene (µg/l)

Highest concentration of Ethylbenzene (µg/l)

Highest concentration of Xylene (µg/l)

Highest concentration of Methane (mg/l)

### Surface Water

0 Number of surface water samples collected

Number of surface water samples exceeding 915-1

If surface water is impacted, other agency notification may be required.

## OTHER INVESTIGATION INFORMATION

☐ Were impacts to adjacent property or offsite impacts identified?

☒ Were background samples collected as part of this site investigation?

Four (4) background soil samples were collected from undisturbed native material adjacent to the former production facility location, at comparable depths and soil composition to the confirmation soil samples, as described in a previous Form 27-Supplemental (Document No. 403666354).

☐ Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards)

Volume of liquid waste (barrels)

☒ Is further site investigation required?

Historically impacted soil remains at sample location AST-B02@3", SEP1-B01@4', SEP1-B02@4', SEP3-B02@4', SEP4-B01@4', and SEP4-B02@4'. Excavation and site assessment activities to address remaining soil impacts at the former SEP and AST locations are currently on hold due to wildlife stipulations, as this site is located within a Bald Eagle Active Nest Site Half-Mile Buffer. As such, excavation and site assessment activities are expected to be completed after August 1, 2024, and will be summarized in a forthcoming Form 27-Supplemental update. As such, no additional site assessment or remediation activities have been conducted at this site since the previous Form 27-Supplemental update was submitted to the ECOM on May 31, 2024 (Document No. 403798243). As such, no additional screening or sampling results are provided in this document.

## REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Historically impacted soil remains at sample locations AST-B02@3", SEP1-B01@4', SEP1-B02@4', SEP3-B02@4', SEP4-B01@4', and SEP4-B02@4'. To-date, no impacted soil has been removed from this location or transported off-site for disposal. Excavation and site assessment activities to address remaining soil impacts at the former SEP and AST locations have not yet been initiated, and will be summarized in a forthcoming Form 27-Supplemental update. Impacted soils will be removed and transported to a licensed disposal facility in accordance with Rules 905 and 906. Disposal records will be kept on file and available upon request.

## REMEDIAL ACTION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Laboratory analytical results indicated that historically impacted soil remains at sample locations AST-B02@3", SEP1-B01@4', SEP1-B02@4', SEP3-B02@4', SEP4-B01@4', and SEP4-B02@4' due to BTEX, TPH, TMB, and/or PAH concentrations above the ECMC Table 915-1 soil standards. Excavation and site assessment activities to address remaining soil impacts at the former SEP and AST locations have not yet been initiated, and will be summarized in a forthcoming Form 27-Supplemental update. Excavation and site assessment activities to address remaining soil impacts at the former SEP and AST locations are currently on hold due to wildlife stipulations, as this site is located within a Bald Eagle Active Nest Site Half-Mile Buffer. As such, excavation and site assessment activities are expected to be completed after August 1, 2024. Laboratory analytical results indicated that the remaining constituent concentrations in the soil samples collected during facility decommissioning activities were in compliance with ECMC Table 915-1 standards and/or within site-specific background levels (x 1.25 for metals). Hydrocarbon-impacted soil was not observed during field inspection and soil screening activities at the remaining production facility infrastructure locations. Groundwater has not been encountered during facility decommissioning activities completed to-date. Estimated time to attain NFA is TBD based on the extent of impacted soil remaining. No additional decommissioning or assessment activities have been conducted at this site since the previous Form 27-Supplemental update was submitted to the ECMC on May 31, 2024 (Document No. 403798243). As such, no additional screening or sampling results are provided in this document.

## Soil Remediation Summary

☐ In Situ

\_\_\_\_\_ Bioremediation ( or enhanced bioremediation )

\_\_\_\_\_ Chemical oxidation

\_\_\_\_\_ Air sparge / Soil vapor extraction

\_\_\_\_\_ Natural Attenuation

\_\_\_\_\_ Other \_\_\_\_\_

☐ Ex Situ

\_\_\_\_\_ Excavate and offsite disposal

If Yes: Estimated Volume (Cubic Yards) \_\_\_\_\_

Name of Licensed Disposal Facility or ECMC Facility ID # \_\_\_\_\_

\_\_\_\_\_ Excavate and onsite remediation

\_\_\_\_\_ Land Treatment

\_\_\_\_\_ Bioremediation (or enhanced bioremediation)

\_\_\_\_\_ Chemical oxidation

## Groundwater Remediation Summary

\_\_\_\_\_ Bioremediation ( or enhanced bioremediation )

\_\_\_\_\_ Chemical oxidation

\_\_\_\_\_ Air sparge / Soil vapor extraction

\_\_\_\_\_ Natural Attenuation

\_\_\_\_\_ Other \_\_\_\_\_

## GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

## REMEDIATION PROGRESS UPDATE

### PERIODIC REPORTING

#### Approved Reporting Schedule:

☒ Quarterly ☐ Semi-Annually ☐ Annually ☐ Other

#### ☐ Request Alternative Reporting Schedule:

☐ Semi-Annually ☐ Annually ☐ Other

Rule 913.e:

After initial approval of a Form 27, the Operator will provide quarterly update reports in a Supplemental Form 27 to document progress of site investigation and remediation, unless an alternative reporting schedule has been requested by the Operator and approved by the Director. The Director may request a more frequent reporting schedule based on site-specific conditions.

Report Type: ☐ Groundwater Monitoring ☐ Land Treatment Progress Report ☐ O&M Report

☒ Other  Project Status Update

### Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).

If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

KMOG has sufficient insurance and bonding to fully address the anticipated costs of Remediation, including the remaining estimated costs for this project. KMOG currently has over 40 million in bonds with the Colorado Energy and Carbon Management Commission. The cost for remediation is a preliminary estimate only, costs may change upwards or downward based on site-specific information. KMOG makes no representation or guarantees as to the accuracy of the preliminary estimate.

Operator anticipates the remaining cost for this project to be: \$ 12500

### WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? No

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

Volume of E&P Waste (solid) in cubic yards

E&P waste (solid) description

ECMC Disposal Facility ID #, if applicable:

Non-ECMC Disposal Facility:

Volume of E&P Waste (liquid) in barrels

E&P waste (liquid) description

ECMC Disposal Facility ID #, if applicable:

Non-ECMC Disposal Facility:

## REMEDIATION COMPLETION REPORT

### REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No

If YES:

☐ Compliant with Rule 913.h.(1).

☐ Compliant with Rule 913.h.(2).

☐ Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards? No

Does the previous reply indicate consideration of background concentrations?

Does Groundwater meet Table 915-1 standards? Yes

Is additional groundwater monitoring to be conducted? \_\_\_\_\_

Operator shall comply with the ECMC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

## RECLAMATION PLAN

### RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Following the completion of remediation and site assessment activities, the site will be reclaimed in accordance with ECMC 1000 Series Reclamation Rules. Timeliness of reclamation initiation and completion will be subject to NFA, surface owner discretion and land use, and suitable ground conditions which allow for execution of surface reclamation activities so as to not cause unwarranted damages

Is the described reclamation complete? No

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

☐ Interim

☐ Final

Did the Surface Owner provide the seed mix? Yes

If YES, does the seed mix comply with local soil conservation district recommendations? Yes

Did the local soil conservation district provide the seed mix? No

### SITE RECLAMATION DATES

Proposed date of commencement of Reclamation. 08/01/2025

Proposed date of completion of Reclamation. 08/31/2025

## IMPLEMENTATION SCHEDULE

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

### PRIOR DATES

Date of Surface Owner notification/consultation, if required. 11/09/2023

Actual Spill or Release date, or date of discovery. 11/09/2023

### SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). 11/08/2023

Proposed site investigation commencement. 11/08/2023

Proposed completion of site investigation. 11/30/2024

### REMEDIAL ACTION DATES

Proposed start date of Remediation. 09/01/2024

Proposed date of completion of Remediation. 11/30/2024

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

☐ Change from approved implementation schedule per Rule 913.d.(2).

Basis for change in implementation schedule:

**OPERATOR COMMENT**

Historically impacted soil remains at sample location AST-B02@3", SEP1-B01@4', SEP1-B02@4', SEP3-B02@4', SEP4-B01@4', and SEP4-B02@4'. Excavation and site assessment activities to address remaining soil impacts at the former SEP and AST locations are currently on hold due to wildlife stipulations, as this site is located within a Bald Eagle Active Nest Site Half Mile Buffer. As such, excavation and site assessment activities are expected to be completed after August 1, 2024, and will be summarized in a forthcoming Form 27-Supplemental update. No additional decommissioning or assessment activities have been conducted at this site since the previous Form 27-Supplemental update was submitted to the ECMC on May 31, 2024 (Document No. 403798243). As such, no additional screening or sampling results are provided in this document.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
