General Comment:

On 8/21/2024, Reclamation Specialist Trujillo conducted a final reclamation inspection at SWN Production Company LLC's TICONDEROGA #24-2 location in Moffat County, Colorado.

This inspection is in response to Form 4 #403799536 stating "Final Reclamation is Complete".

It was observed in this inspection that reclamation has not been completed pursuant to 1004 requirements.

The following compliance issues were observed during this inspection:

- Uniform vegetative establishment
- Utility equipment remaining
- Weeds

Refer to the Reclamation section of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspection that have not been addressed are still applicable.

Corrective Action: _____ Date **10/15/2024**

Conduct reclamation in accordance with 1004 rules at the Locations/Spur Road including, but not limited to, removal of utility equipment and gravel; perform compaction alleviation, recontour/regrade and establish vegetation with total perennial, non-invasive uniform plant cover of at least 80% of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local soil conservation district.

Comply with Rule 1002.f and ensure erosion controls are implemented to stabilize the seeded soil.

Comply with Rules 1004.e and 606.c: Oil and Gas Locations will be kept free of all Undesirable Plant Species.

Ongoing stormwater and weed management required until Final Reclamation has passed.

Overall Final Reclamation

FailWell Release on Active Location ☐Multi-Well Location ☐**ECMC Comments**

Comment	User	Date
<p>Pursuant to Rule 1004.a, all debris and surface equipment shall be removed within three (3) months of plugging a well. Well locations, access roads and associated facilities shall be reclaimed. As applicable, compaction alleviation, restoration, and revegetation of well sites, associated production facilities, and access roads shall be performed to the same standards as established for interim reclamation under Rule 1003. All other equipment, supplies, weeds, rubbish, and other waste material shall be removed. All such reclamation work shall be completed within twelve (12) months on non-crop land after plugging a well or final closure of associated production facilities.</p> <p>Main access road leading Southeast from the Location pre-existed O&G disturbance. Spur section of the access road / the Location entrance has not achieved a uniform vegetative cover, and remains bare; gravel and compaction issues evident within these areas. Additionally, Utility equipment on, and leading to the Location has not been removed, and Noxious weeds (Scotch thistle) were observed established throughout the Location. Species observed planted do not reflect species within the adjacent undisturbed reference areas, or vegetation that existed pre-disturbance- records indicate surface owner approved mix.</p>	trujilloam	09/05/2024
