**Comments:** Final reclamation of the Sagebrush Hills II Fed 4506 well pad (API 05-103-08410) was completed in 2017. 2023 qualitative and quantitative monitoring shows that final reclamation of the well pad disturbance is successful and a self-perpetuating native plant community has been reestablished that approximates adjacent reference area composition and cover. Please see the attached third-party vegetation survey report for additional details. Identified weeds were treated following this assessment.
