(Other) TEST FOR OIL PRODUCTION ☒

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

18. Date of work \_\_\_\_\_

\* Must be accompanied by a cement verification report.

On 11-08-85, a field inspection trip was made with the B.L.M. (Alan Schroeder) and Twin Arrow, Inc. (Don Miller, Trenton Day and Tom Humes). The Moran lease was one of the locations visited.

With B.L.M. approval, Twin Arrow, Inc. is requesting this well be put on a "Temporary Abandoned" status for 6 months, to give us time to put a rig on location and swab well to test for commercial production. The fluid level in the well is 41 feet from surface. An oil sample was taken with a thief at 120' and 225' from surface with no water in the sample.

The above location (500" FSL, 300" FEL). I determined with a transit, compass, tape measure from the brass marker at the corner of sections 3, 4, 9, and 10. This well is not in agreement with anything we have in our well file.

19. I hereby certify that the foregoing is true and correct

SIGNED

Trenton Day
