Basis for change in implementation schedule:

Following landowner negotiations and crew availability in accordance with this remediation workplan, Noble will complete the decommissioning of the site infrastructure as outlines in this remediation workplan. Supplemental Form 27's will be prepared and submitted on a quarterly schedule to provide updates and progress of the remediation until closure criteria have been achieved.

**OPERATOR COMMENT**

This form is being submitted as a third quarter timeline update for the WELLS AE32-635 wellhead cut and cap wellhead and flowline.

Decommissioning activities at the wellhead started on 7/10/2024. An environmental assessment was unsuccessful at the time due to health and safety concerns/field constraints. Confirmation soil samples at the former wellhead will be collected via alternative methods. An updated site map has been provided to reflect the field screening and soil sampling that will be collected at the wellhead. Flowline decommissioning activities will be summarized in a subsequent supplemental form 27 submittal.

Pending location landowner approval and crew availability, Noble will complete the decommissioning of the site infrastructure as outlined in this proposed remediation workplan. Supplemental Form 27s will be prepared and submitted on a quarterly schedule to provide updates and progress of the remediation until closure criteria has been achieved.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
