General Comment:

On 8/21/2024, Reclamation Specialist Trujillo conducted a final reclamation inspection at SWN Production Company LLC's WALKER #12-3 location in Moffat County, Colorado.

This inspection is in response to Form 4 #403816934 stating "Final Reclamation is Complete".

It was observed in this inspection that reclamation has not been completed pursuant to 1004 requirements.

The following compliance issues were observed during this inspection:

- Access road has not been reclaimed
- Utility and riser equipment remaining
- Weeds

Refer to the Reclamation section of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspection that have not been addressed are still applicable.

|---|--------------------------|--|
| <p>Conduct reclamation in accordance with 1004 rules at the Locations/Road including, but not limited to, removal of surface equipment and gravel; perform compaction alleviation, recontour/regrade and establish vegetation with total perennial, non-invasive uniform plant cover of at least 80% of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local soil conservation district.</p> <p>Comply with Rule 1002.f and ensure erosion controls are implemented to stabilize the seeded soil.</p> <p>Comply with Rules 1004.e and 606.c: Oil and Gas Locations will be kept free of all Undesirable Plant Species.</p> | | |

| Comment | User | Date |
| <p>Pursuant to Rule 1004.a, all debris, abandoned gathering line risers and flowline risers, and surface equipment shall be removed within three (3) months of plugging a well. All access roads to plugged and abandoned wells and associated production facilities shall be closed, graded and recontoured. Well locations, access roads and associated facilities shall be reclaimed. As applicable, compaction alleviation, restoration, and revegetation of well sites, associated production facilities, and access roads shall be performed to the same standards as established for interim reclamation under Rule 1003. All other equipment, supplies, weeds, rubbish, and other waste material shall be removed. All such reclamation work shall be completed within twelve (12) months on non-crop land after plugging a well or final closure of associated production facilities.</p> <p>It was observed in this inspection that the access road to the Location has not been reclaimed in accordance with ECMC 1004 Rules. Within areas of the access road where work is evident (road at location entrance), Operator appears to have only pushed/dumped/placed soil on top of the road, and then seeded into the placed soils; gravel/compaction evident beneath the placed soils. It was also observed that species planted do not reflect species within the adjacent undisturbed reference areas, or vegetation that existed pre-disturbance. Additionally, utility equipment on, and leading to the Location has not been removed, and a riser remains on the south end of the Location adjacent to the road. Noxious weeds (Scotch thistle) observed established on the Location.</p> | trujilloam | 09/05/2024 |
