This location is on Federal Surface with Federal minerals. Final reclamation of the Sagebrush Hills II Fed 4506 well pad was completed in 2017. 2023 quantitative monitoring, 2024 qualitative monitoring, and a BLM final reclamation inspection shows that reclamation of the Well Site is successful and a self-perpetuating native plant community has been reestablished that approximates adjacent reference area composition and cover.

The location received a passing final inspection and an associated Final Abandonment Notice has been approved by the Bureau of Land Management (attached).
