Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27.

This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	SOILS	Refer to Doc# 403812716	Confirmation Soil Sampling

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

On March 7 & 8, 2024, field screening and confirmation soil sampling activities were conducted in accordance with the ECMC Rule 911 during the decommissioning of the Bunn M. 1-34 wellhead (Figure 1) and removal of the associated flowline (Figure 2). On March 8, 2024, it was determined that a historic release was discovered at the wellhead when analytical results returned with organic compound exceedances at soil sample location WH01-B. On March 7, 2024, mitigation activities were initiated and to date approximately 9 cubic yards of impacted material were removed from the wellhead excavation and transported to the North Weld Waste Management Facility for disposal under a PDC waste manifest. Due to the location being adjacent to a public park, excavation activities were not re-initiated.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

On March 7, 2024, one waste characterization soil sample (WC01) was collected from the wellhead source area at approximately 4 feet below ground surface (bgs). The sample was submitted for laboratory analysis of the full ECMC Table 915-1 analytical suite. Analytical results indicated that site specific COCs include: benzene, toluene, ethylbenzene, and total xylenes (BTEX), naphthalene, total petroleum hydrocarbons (TPH[C6-C36]), 1,2,4-trimethylbenzene (TMB), 1,3,5-TMB, acenaphthene, anthracene, benzanthracene, chrysene, fluoranthene, fluorene, pyrene, 1-methylnaphthalene (M), 2M, arsenic, barium, and selenium.

### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered during supplemental site investigation activities, a grab sample will be collected as soon as practical. If contaminated soil is in contact with groundwater or if free product/hydrocarbon sheen are observed, the release will be reported in accordance with Rule 912.b. Groundwater samples will be submitted for laboratory analysis of BTEX, naphthalene, 1,2,4-trimethylbenzene (TMB), and 1,3,5-TMB by EPA Method 8260, chloride and sulfate anions by EPA Method 300.0, and total dissolved solids (TDs) by Method SM 2540C.

### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

## Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

On March 7 & 8, 2024, soil encountered on-site and below production equipment was visually inspected and field screened for volatile organic compound (VOC) concentrations using a photoionization detector (PID). Due observed hydrocarbon impacts and excavation activities at the wellhead, soil samples (WH01-B & WH01-N) collected from the base and sidewall exhibiting the highest PID response were submitted for analysis of the full Table 915-1 analytical suite. 6 soil samples (FL01-01 - FL01-05 & DL01-01) were collected every 250 feet along the flowline, at the changes in direction, and along a dump line at the tank battery. Soil samples (FL01-01 - FL01-05 & DL01-01) were submitted for laboratory analysis of the full Table 915-1 analytical suite. Analytical results indicated that organic and inorganic compounds were in exceedance of the applicable standards in soil sample WH01-B. Arsenic, barium, lead, and/or pH was in exceedance of the applicable standards in the remaining soil samples.

# SITE INVESTIGATION REPORT

## SAMPLE SUMMARY

### Soil

Number of soil samples collected 9  
Number of soil samples exceeding 915-1 9  
Was the areal and vertical extent of soil contamination delineated? No  
Approximate areal extent (square feet) 100

### NA / ND

Highest concentration of TPH (mg/kg) \_\_\_\_\_  
Highest concentration of SAR \_\_\_\_\_  
BTEX > 915-1 Yes  
Vertical Extent > 915-1 (in feet) 6

### Groundwater

Number of groundwater samples collected 0  
Was extent of groundwater contaminated delineated? No  
Depth to groundwater (below ground surface, in feet) \_\_\_\_\_  
Number of groundwater monitoring wells installed \_\_\_\_\_  
Number of groundwater samples exceeding 915-1 \_\_\_\_\_

Highest concentration of Benzene (µg/l) \_\_\_\_\_  
Highest concentration of Toluene (µg/l) \_\_\_\_\_  
Highest concentration of Ethylbenzene (µg/l) \_\_\_\_\_  
Highest concentration of Xylene (µg/l) \_\_\_\_\_  
Highest concentration of Methane (mg/l) \_\_\_\_\_

### Surface Water

0 Number of surface water samples collected  
0 Number of surface water samples exceeding 915-1  
If surface water is impacted, other agency notification may be required.

## OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

On March 8, 2024, eight background soil samples (BKG01 & BKG02) were collected from native material topographically up-gradient of the wellhead & tank battery location between depths of approximately 0.5 feet and 4 feet bgs and submitted for laboratory analysis of ECMC Table 915-1 Metals. Analytical results indicated that arsenic, barium, & selenium were observed in exceedance of the applicable regulatory standards in native material.

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) 9 Volume of liquid waste (barrels) 0

Is further site investigation required?

Based on the final analytical results, supplemental source mass removal activities are proposed to be initiated to remove remaining hydrocarbon impacted material via mechanical excavation adjacent to and below soil sample WH01-B. Confirmation soil samples will be collected from the base and sidewalls of the final excavation extent and submitted for laboratory analysis of the full ECMC Table 915-1 analytical suite. Based on upcoming crew availability, PDC will forgo the previously proposed soil boring site investigation/delineation of organics and conduct source mass removal activities.

Previously proposed delineation of SSR and metal exceedances and the native material evaluation identified during commissioning activities, and collection of additional background samples. Supplemental remedial excavation activities are proposed to be completed by the end of Fourth Quarter 2024.

## REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

### SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Any hydrocarbon impacted material will be transported off-site to a licensed disposal facility in accordance with Rules 905 and 906.

### REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

On March 8, 2024, a historic release was discovered following receipt of preliminary analytical results from soil samples collected during decommissioning activities at the Bunn M. 1-34 Wellhead. On March 7, 2024, two (2) soil samples (WH01-B & WH01-N) were collected from the base and sidewall exhibiting the highest PID response from the wellhead excavation. On March 8, 2024, six (6) soil samples (FL01-01 - FL01-05 & DL01-01) were collected along the flowline every 250 feet, at the significant direction changes, and along the dump line at the tank battery. Soil samples (FL01-01 - FL01-05) were submitted for laboratory analysis of the full Table 915-1 analytical suite. Analytical results indicated that organic and inorganic compound concentrations were in exceedance of the applicable Table 915-1 standards in the following samples:

WC01: Benzene, ethylbenzene, xylene, 1,2,4 & 1,3,5-TMB, naphthalene, TPH (C6-C36), benzanthracene, 1-M, 2-M, arsenic, barium, & selenium  
 WH01-B: 1,2,4 & 1,3,5-TMB, TPH (C6-C36), benzanthracene, 1-M, 2-M, & selenium  
 WH01-N: pH, arsenic, & barium  
 FL01-01: arsenic & lead  
 FL01-02, FL01-03, & FL01-05: arsenic  
 FL01-04: arsenic & barium

Attachments were included on previously submitted and approved Supplemental Form 27 Document# 403812716.

**Soil Remediation Summary**

**GROUNDWATER MONITORING**

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

Groundwater was not encountered during decommissioning of the wellhead and removal of the flowline.

Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards? \_\_\_\_\_

Does the previous reply indicate consideration of background concentrations? \_\_\_\_\_

Does Groundwater meet Table 915-1 standards? \_\_\_\_\_

Is additional groundwater monitoring to be conducted? \_\_\_\_\_

Operator shall comply with the ECMC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

## RECLAMATION PLAN

### **RECLAMATION PLANNING**

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Following wellhead decommissioning and flowline removal activities, the location was be backfilled, compacted, and re-contoured to match preexisting conditions. The location will be reclaimed in accordance with the ECMC 1000 series.

Following additional source mass removal activities, the location will be backfilled, compacted, and re-contoured to match preexisting conditions. The location will be reclaimed in accordance with the ECMC 1000 series.

Is the described reclamation complete?  Yes \_\_\_\_\_

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

Interim  Final

Did the Surface Owner provide the seed mix? \_\_\_\_\_

If YES, does the seed mix comply with local soil conservation district recommendations? \_\_\_\_\_

Did the local soil conservation district provide the seed mix? \_\_\_\_\_

### **SITE RECLAMATION DATES**

Proposed date of commencement of Reclamation. 03/07/2024

Proposed date of completion of Reclamation. 03/07/2029

## IMPLEMENTATION SCHEDULE

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

### **PRIOR DATES**

Date of Surface Owner notification/consultation, if required. 09/11/2023

Actual Spill or Release date, or date of discovery. 03/08/2024

### **SITE INVESTIGATION DATES**

Date of Initial Actions described in Site Investigation Plan (start date). 03/07/2024

Proposed site investigation commencement. 09/24/2024

Proposed completion of site investigation. 12/31/2024

### **REMEDIAL ACTION DATES**

Proposed start date of Remediation. 03/07/2024

Proposed date of completion of Remediation. 03/07/2029

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

Change from approved implementation schedule per Rule 913.d.(2).

Basis for change in implementation schedule:

Based on soil analytical results received for samples collected during decommissioning activities, supplemental source mass removal activities are required in the vicinity of soil sample WH01-B. Supplemental remedial excavation activities are proposed to be completed by the end of Fourth Quarter 2024.

**OPERATOR COMMENT**

This Supplemental Form 27 is being submitted as a Third Quarter 2024 timeline update for the completion of the remedial excavation at the Bunn M. 1-34 wellhead. Per ECMC request, tables and figures previously submitted have not been included with this form submittal. Please refer to ECMC document no. 403812716 for previously submitted tables and figures.

The condition of approval issued on approved Supplemental Form 27 Document #403812716 indicated: "Operator shall analyze soil borings for all Table 915-1 Contaminants of Concern. Operator may re-evaluate a reduced analyte list based on soil boring supplemental site investigation analytical results prior to excavation." Based on upcoming crew availability, PDC will forgo the previously proposed soil boring site investigation/delineation of organics and conduct source mass removal activities. Since the remedial path forward has changed, samples collected from the final excavation extent will be submitted for the full ECMC Table 915-1 analysis.

Supplemental remedial excavation activities are proposed to be completed by the end of Fourth Quarter 2024.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
