**REMEDIAL ACTION PLAN**

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

**SOURCE REMOVAL SUMMARY**

Describe how source is to be removed.

The source will be removed through mechanical excavation. Excavation is tentatively scheduled for October 2024. Grab soil confirmation samples will be collected to determine the lateral and vertical extent of impacts. All soil samples will be submitted to a certified laboratory for analysis of Table 915-1 metals and organic compounds, TPH C6-36, EC, SAR, pH, and boron.

**REMEDICATION SUMMARY**

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Source removal will be scheduled. Due to shallow groundwater Table 915-1 protection of groundwater soil screening levels will be utilized. Background samples will be collected outside the release area from homogenous soil horizons and/or corresponding excavation soil sample depths. A groundwater site assessment will be scheduled subsequent to source removal, tentatively scheduled for December 2024. The estimated timeframe to achieve a no further action will be December 31, 2025. The estimated no further action date takes into account source removal, monitoring well installation, and four consecutive quarters of ECMC compliant groundwater. If impacted groundwater is identified during monitoring well sampling, the estimated timeframe to achieve a no further action will change.

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

A groundwater site assessment will be scheduled to delineate impacted groundwater. Monitoring wells will be installed and will be sampled on a quarterly basis. Groundwater samples will be submitted to a certified laboratory for analysis of BTEX, naphthalene, 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, chlorides, sulfates, and TDS. A groundwater elevation figure and bore logs will be submitted on a supplemental form 27. Pending landowner approval, the groundwater site assessment will be completed prior to December 30, 2024.

## Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).

If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

The General Liability coverage within the Civitas Resources insurance program includes coverage for bodily injury, property damage, and pollution clean-up costs arising from qualifying pollution events of a sudden and accidental nature subject to a \$1,000,000 per occurrence limit and \$2,000,000 aggregate limit. The Civitas Resources insurance program includes Excess Liability coverage of \$110,000,000 per occurrence and in the aggregate which sits over the sudden and accidental pollution within the General Liability coverage. It is the opinion of Civitas Resources that this total tower of limit is adequate to address the costs of remediation associated with any qualifying pollution event.

Operator anticipates the remaining cost for this project to be: \$ 120000
