Hey Tommy,
Understood, thank you for clarifying. Please keep us in the loop on the progress of those, otherwise CPW has no further concerns. Thanks!

Hi Lexi,

For the Moser PC H22-21, we are planning on getting that one completed prior to Nov 15th, and if it gets pushed, we will either re-consult with CPW, or wait until after the roosting season to complete this P&A job.

LATHAM 02-42 is currently scheduled for December. Chevron will rework the schedule and try to get to this well prior to the Bald Eagle Nesting Season, if that is not possible, we will delay this job until after the BAEA nesting season, or re-consult with CPW if the job can not be delayed for any unforeseen reason.

Let me know if you need any further clarification.

Thanks,

Tommy Coulfa

Hi Tommy,

Thank you for sending your planned P&A schedule. The only concerns I see are for MOSER PC H22-21D and LATHAM 02-42.

For MOSER PC H22-21D: It states that work is scheduled for Nov 1, will work be completed by the 15th?

For LATHAM 02-42: It says that the proposed schedule date is 12/1 but then says that work will be rescheduled to occur outside of the timing stipulations (both Nov 15- March 15 and Dec 1- July 31). Can you clarify this?

Thank you for clarification on these.
