### LEGEND

- Background Sampling Location
- KMG Rem #25626 Sample Location

NOTE: KPK compiled background samples within the Koch site boundary (approximately 18 acres of land containing 3 KPK sites and 1 Kerr-McGee Oil and Gas site within 1/2 linear mile) to calculate Established Site-Specific Background Concentrations for Table 915-1 Inorganics.

Background-14 collected at the Koch 41-6 site was not used to calculate Established Site-Specific Background Concentrations due to the proximity to previous operations.
