Comments:

The former CPC-SEC.4 4 42-4 well (API: 05-123-08861) was P&A'd on June 24, 1996, as identified in the Well Abandonment and Plug Report, Document Number 32584. On April 19, 2024, Ensolum conducted a final reclamation inspection for the former CPC-SEC.4 4 42-4 well pad (Location ID: 406594) and it was determined that the site is compliant with final reclamation requirements per ECMC Rule 1004.

During the inspection it was observed that the former CPC-SEC.4 4 42-4 well is located within an active residential development known as NorthSkye, under the operational control of Toll Brothers and Lennar. The associated tank battery located 0.25-miles north of the P&A'd well site, has since been reclaimed and is also located within the residential development. All associated road base and equipment related to oil and gas activities have been removed from the well location. Ensolum personnel located the P&A wellhead location using a handheld Trimble DA2 Global Positioning System (GPS) unit and latitude and longitude coordinates obtained from the ECMC online database. A general site location map is included as Figure 1; and the Site Map displaying the location of the reclaimed site on aerial imagery is included as Figure 2. Photographs of the P&A location were taken facing each cardinal direction from the P&A wellhead location. The photographic log is included as Attachment 1.

The previous land use for the former CPC-SEC.4 4 42-4 well is defined as agriculture per ECMC GIS aerial imagery. The land use has changed and is now an active construction site for residential development. Based on rule 1004.d, a Form 4 Sundry Notice requesting final reclamation status has been prepared for the submittal to the ECMC. This letter will be included as an attachment to the electronic Form 4 submittal.
