General Comment:

This is an environmental inspection for Facility ID 245261 Halverson 1 TB and WH. Any corrective actions from previous inspections that have not been addressed are still applicable. There were no operator or contract environmental personnel on location at the time of this field inspection. Photos attached to document site conditions. LO was onsite during inspection.

Comment:	Statewide unnecessary equipment, weeds, waste, and trash requirements			
Corrective Action:	Comply with Rule 606			Date: 10/26/2024
Overall Good: <input type="checkbox"/>				
Spills:				
Type	Area	Volume		
In Containment: No				
Comment:	This inspection was in response to a spill at this location from November 2023, with ongoing remediation. Groundwater monitoring wells have been implemented at the wellhead and are planned for the tank battery. Ideally the Operator will construct the wells at the tank battery prior to December 1, 2024 due to an active bald eagle nest within close proximity to the excavation area, which would deter work until after August 1, 2025.

Type of Spill: _____

Estimated Spill Volume: _____

Comment: ECMC environmental and reclamation staff have been on location and are tracking clean up operations. The Operator has delineated soil impacts vertically but are still trying to fully delineate to the East. The Operator has stated these activities will continue next week and will be completed prior to the bald eagle stipulation coming into effect. Additionally, the Operator plans to install monitoring wells at the TB prior to the eagle stip.

Remediation activities are ongoing at this location. The LO is not happy with the situation as it has been going on for several years with no tangible results toward completion. The LO is also very concerned that the Operator is unable or unwilling to provide the proper top soil for his crops upon completion of the remediation.
