FYI, netting was ordered today and will be here on Friday. Our crew had to refresh utility locates that had expired. It will be clear to dig on Friday. Our crew will be there on Friday to dig the north wall and east wall which is the only remaining soil contamination. The hole will be backfilled so we can reopen the road. We will keep a net over the hole until we backfill above the groundwater table.

Afterward, KPK will conduct full gw assessment.

JP

Hi Laurel,

Thanks for the update, that is unfortunate news, hopefully we can get this addressed soon to prevent any wildlife impacts.

Good evening, Lexi,

I stopped by this location today. No crews were on location at the time of inspection. No netting/wildlife protection equipment has been installed. The excavation has grown, free product was visible on groundwater within the open excavation and stained soil remains visible within the open excavation. I'll include you on my followup inspection.

Let me know if you have any questions in the meantime,

Hi Laurel,

Is there an update on this? Has KPK made any progress in addressing the issues?
