Best Management Practices

No	BMP/COA Type	Description
	Noise mitigation	Noise associated with pipe handling, traffic, and other operational activity will be minimized between 7:00 pm and 7:00 am. Based off the rig sound signature, rig orientation will be considered to reduce noise levels to nearby building units.`
	Community Outreach and Notification	Signs will be placed in conspicuous locations and will include Oxy contact information; the Oxy Stakeholder Relations team will respond to all community member inquiries. The signs will be placed so as not to create a potential traffic hazard.`
	Wildlife	This location was reviewed using a desktop method to review publicly available wildlife data (including CPW & ECMC data) as well as internal wildlife datasets and aerial imagery. All field personnel are trained to identify wildlife risks and raise concerns noticed during operations with the Kerr McGee's Health, Safety, and Environment (HSE) department.`
	Community Outreach and Notification	Courtesy notifications will be sent to all parcel owners with building units within 2,000 feet of the location letting them know about our subsequent well operations and providing contact information for Kerr McGee's response line and online resources.`
	Planning	Site lighting will be shielded and directed downward and inward toward operations to avoid glare on public roads and nearby Building Units.`
	Dust control	Water will be placed on dirt access roads to mitigate dust as needed.`
