General Comment:

This is a follow up of the previous reclamation inspections and in regard to NOAV #403595832.
See attached photos and additional details within this report.

LocationOverall Good: ☐

Emergency Contact Number:

Comment: Corrective Action: Date: **Good Housekeeping:**

Type	STORAGE OF SUPL		
Comment:	There is a stock tank at the location that needs to be removed. There are also shooting tagets at the wellsite which is a saftey concern. Operator should coordinate with landowner to determine a more suitable safe place for firearm shooting as this site is an oil and gas lease.		
Corrective Action:	Comply with Rule 606	Date:	10/18/2024
Type	UNUSED EQUIPMENT		
Comment:	The two conex containers have been removed.		
Corrective Action:		Date:	

Overall Good: ☐**Spills:**

Type	Area	Volume		
Other				
Comment:	There was stained soils observed along the roadside at the former tank battery location. The stained soils had a diesel fuel odor and need to be cleaned up and properly disposed.			
Corrective Action:	Conduct maintenance on equipment, cleanup stained material and review self inspection processes. Comply with Rule 1002..(2).D			Date: 10/18/2024

In Containment: No

Comment: ☐ Multiple Spills and Releases?**Tanks and Berms:**

1003 f. Weeds Noxious weeds? _____

Comment

The access road and location are not stabilized and disturbed areas are not reclaimed. The soils that were pushed out during drilling operations have not been replaced and reclaimed. The cut and fill slopes of the location are not vegetated and stabilized. The former tank battery site was contoured however, soils were not graded and remain loose and susceptible to erosion. Previous corrective action was not completed

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: The culverts at the drainage crossing are not adequately sized or installed to handle storm events. The inlet is filled in with debris and there are signs stormwater flowed over the road. There are loose sandy soils along the road that are not stabilized. There are still signs of erosion at the location. The cut and fill slopes are not stabilized and existing BMP's are insufficient. BMP's must be implemented in accordance with good engineering practice and must be maintained. Corrective action will remain out of compliance until completed

Corrective Action: Install or repair required BMPs per Rule 1002.f.(2)

Date: 12/30/2022

Pits: ☒ NO SURFACE INDICATION OF PIT
