COMMENTS:

On 10/15/2024 a Form 17 was completed with a beginning pressure of 71 psi and an ending pressure of 0 psi. Gas was present at the start of the test but was not continuous. A gas sample was collected, and those results will be submitted once the lab has finished their analysis. Due to suspected thermal pressure, well pressures have reached above 50 psi and require mitigation. Chevron will perform blow down(s) if needed until able to perform fluid pull(s) to relieve pressure and allow for expansion in the surface casing for a period of 6 months, ending 4/15/2025. At the end of the 6 months, we will perform an additional Form 17 and a Form 4 follow-up will be submitted.
