Re: Incident at WCR 36 & WCR 49 (403964424, -104.605803)

To Whom It May Concern:

The LaSalle Fire Protection District and the Platte Valley Fire Protection District have researched potential foam usage at the incident that occurred at the Mustang Compressor Station (WCR 36 & WCR 49) in March of 2020. After reviewing the incident reports (PV2020-00119 & LS2020-00148) written by both agencies, we are unable to confirm whether foam was used at this incident or not. Neither report stated that foam was used. However, if foam was used at this incident, both responding agencies utilize Baum's Novacool UEF foam, which does not contain PFOS or PFOA.

Should there be any additional questions, please feel free to contact at 970-353-3890.

Sincerely,

A handwritten signature in black ink, appearing to read "JK", with a long horizontal line extending to the right.

James Klug
Fire Chief
