OPERATOR COMMENT

The SMITH ENERGY CORP. - 70385 COLORADO STATE #16-11 (OWP) oil and gas well (API #05-001-08342) COLORADO STATE-63S62W 16SWSE (Location ID #320182) is in the ECMC Orphaned Well Program ("OWP"). This supplemental Form 27 presents the site investigation results for decommissioning oil and gas facilities. Civitas Resources/Extraction Oil & Gas Inc. plugged and abandoned (PA) the Colorado State #16-11 (OWP) well as part of a public project. Cut and cap soil sample results for sample WH-B01 @7' collected from the base of the wellhead excavation, and spoil pile composite sample, SP-CS01, did not indicate E&P Waste impacts above Table 915-1 soil screening levels (SSL) except for Arsenic (residential), Barium and Lead (protection of groundwater). A site-specific background soil sample was not collected at the wellhead. Groundwater in the area is expected to lie at a depth of approximately 36 feet bgs. The OWP oversaw decommissioning of the remote tank battery and flowline removal. Analytical results indicate that total petroleum hydrocarbons (TPH) were reported at 961 mg/kg in soil sample 320182_SEP01_B01@6' collected beneath the separator. Arsenic and the soil pH were also reported above Table 915-1 soil screening levels (SSL) in this sample. Arsenic was also reported above the Table 915-1 SSL in a soil sample collected beneath the aboveground storage tank (AST). Results for pH and SAR were reported above the Table 915-1 soil suitability for reclamation levels in soil samples collected beneath the AST and produced water vault (PWV). A site-specific background soil sample was collected northwest of the tank battery. Further site investigation and remediation are required and will proceed under Remediation Project #26753.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
