

OIL & GAS  
CONSERVATION COMMISSION

PO Box 493  
Meeker, Colorado  
March 17, 1966

Dear Sir,  
In answer to your telephone call; we  
have drilled down to eleven hundred  
feet and have hit salt water.  
We stopped drilling last fall because  
some stockmen didn't want the  
salt water running through their  
stock. We shut the water off last  
fall as soon as we stopped drilling.  
We intend to start drilling again  
this summer about a hundred to two  
hundred feet deeper, but we can't  
start until some livestock are taken  
out of where the water runs through.  
This will be about the fifteenth of  
June

Sincerely yours;  
Nick Koritsas
