## Permit Closure Report – Land Use Change

**Tank Battery Location ID:** 464272

**Tank Battery Location Name:** BRIGGS-65N66W/17SWSE

### Report Date:

11/14/2024

H2E has conducted a thorough review of the data provided in this report. This report was developed in accordance with ECMC Operator Guidance – Operator supplied Land use change drone imagery and information for submitting a final reclamation completion notice.

### Land Use Year and Type

Land Use 2024 – Housing Development

Land Use 2023 – Housing Development Construction

Land Use 2019 – Oil and Gas Operations

### Inspection:

Performed by	H2E Inc.
Date	10/30/2024

All pertinent data, imagery, and materials are included at the end of this report.

## Closure Information

This final reclamation completion notice is intended to close the BRIGGS-65N66W/17SWSE location which consists of the Briggs #17-1 tank battery. This tank battery does not share a disturbance with any wells or other tank batteries. The associated wellhead has its own location ID (323660) and is being closed in a separate submittal.

The Briggs tank battery location is in Weld County, Colorado and is directly north of Highway 34 and 0.5 miles west of 71<sup>st</sup> Ave. The Briggs #17-1 wellhead and tank battery were plugged in 2019, reclaimed and returned to the landowner for agricultural use. Since then, the land has been converted to a housing development.

There is one off-location flowline associated with this tank battery that transported produced fluids from the associated wellhead. The flowline was fully removed March 21, 2019, via Form 44 (Doc. #: 403906769).

The wellhead and tank battery were accessed from an unnamed access road off Highway 34. The access road was reclaimed in 2019 and returned to the landowner, the current use is a housing development.

There were no Spills (Form 19) identified for the tank battery or associated wellhead during the record search.

There was one Remediation Workplan (Form 27) identified (Remediation Project #13064). This project was for the removal of a partially buried produced water vault. The vault was removed, and soil sampling was conducted. All results were within Table 910-1 limits. As planned and approved, the vault was then backfilled. The Commission approved the request for closure on June 3, 2019. No further action is necessary under this Remediation Project.

During field inspections there was one violation related to tank berms. Linda Pavelka noted during the May 18, 1995, inspection that the tank berms were not large enough. This violation was cleared during the follow-up inspection on September 15, 1995.

Two Corrective Actions (CA's) were identified during the records review. The inspection by Jason Gomez on 4/30/2014 (#673800844 – 4/30/2014) stated the wellhead sign was lying on the ground. In addition, a NFPA label was needed on the produced water tank. The CA required installing signs to comply with rule 210. Corrective Actions were due by May 30, 2014. A follow-up inspection noted the CAs were completed and in compliance (#673802912 – 3/1/2016). The second CA was from the inspection on 8/20/2019. Inspector Santistevan stated that an unused gas meter house was left at the tank battery location. All other equipment had been removed. The CA required compliance with Rule 603.f. (Insp #679601376 – 8/20/2019). A FIR Resolution Form was submitted September 17, 2019, stating the gas meter was removed and the location was in compliance with Rule 603.f (Doc #402179969).

Drone imagery confirms that no equipment was left on site at this location after reclamation activities occurred.
