Comment: **The well was plugged and abandoned on 8/9/2022 and the wellsite remediation was completed as of 1/29/2024. There is a lined pit at the northwest side of the location which should have been closed upon well abandonment. The closure of the pit has been initiated with a recent form 27. The northwest area of the location will need to be recontoured and reclaimed. All reclamation should be completed before this upcoming growing season. The location will remain out of compliance until all reclamation requirements are completed.**
