## Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

## OPERATOR COMMENT

The previous Supplemental Form 27 (403718248) with a request for closure was denied with the following conditions of approval (COAs):

1) Approval of this Form 27 does not imply approval of pre-abandonment in place notice required by Rule 1105.d.(2). for Flowline abandonment.

2) ECMC removed the final closure request at this time; the Operator states in the Initial Action Summary doc# 403119215, received 07/27/2022, " Pursuant to COGCC Rule 911 a site investigation will be conducted pertaining to the LINDSAY C33-10 wellhead cut and cap and flowline removal. Approximately 1593' of flowline will be removed". The operator shall provide Flowline Data before NFA can be achieved.

Noble intends to address these COA's within 6 months of submittal of these forms, site access and weather permitting.

The requisite quarterly Form 27 submittals will be submitted as necessary.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
