Description of Corrosion Protection

Crestone pipelines are covered in a protective external coating. Flowlines are subject to thorough inspections and fabrication standards during installation to minimize coating and pipe defects. Crestone maintains a chemical program to reduce internal corrosion. If a flowline is found to lack integrity, Crestone will investigate, report, and remediate any spills in accordance with the 900 series rules.

Description of Integrity Management Program

Crestone flowlines are pressure tested prior to placing flowlines into service. Flowlines are tested on an annual basis in accordance with COGCC 1104 series rules. If a flowline is found to lack integrity, Crestone will investigate the root cause, as well as report and remediate any spills in accordance with the 900 series rules. All repairs will be completed in accordance with COGCC 1102 Series rules.

Description of the construction method used for public by-ways, road crossings, sensitive wildlife habitats, sensitive areas, and natural and manmade watercourses (i.e., open trench, bored and cased, or bored only), if applicable.

OFF LOCATION FLOWLINE Abandonment Verification

Date: 10/27/2023

Abandonment Verification

The abandoned Off-Location Flowline was located within the jurisdiction(s) of the following local government(s).

(No Jurisdiction)

Description of Abandonment Verification:

The flowline serviced the ARISTOCRAT 24-3C (05-123-12821). The flowline was originally planned for full removal; however, it was partially ABiP due to asbestos. It was abandoned in place as per Rule 1105.d. The portion of the flowline that was removed was removed via the open trench method. The trench was backfilled and the land surface graded. See attached exhibit for third party verification, flowline path exhibit, and ECMC correspondence.

OFF LOCATION FLOWLINE Realignment, Out of Service, Pre-Abandonment Notice, or Abandonment Verification

Date: 05/16/2023

Description of Realignment, Out of Service, Pre-Abandonment Notice, or Abandonment Verification:

The flowline (12316352_FL) serving the Aristocrat Angus 13-3 (05-123-16352) was removed in its entirety via the open trench method. The trench was backfilled and the land surface graded.

OPERATOR COMMENTS AND SUBMITTAL

Comments Form 44 filed to report POST-ABANDONMENT verification. The following flowline was partially ABiP and partially removed:
12312821_FL: serviced Aristocrat 24-3C (05-123-12821)

Pressure test attached.
Third party verification attached.
Updated GIS data attached.
Flowline path exhibit attached.
ECMC correspondence attached.
All other related flowlines will remain as previously reported.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
