Description of Corrosion Protection

Crestone pipelines are covered in a protective external coating. Flowlines are subject to thorough inspections and fabrication standards during installation to minimize coating and pipe defects. Crestone maintains a chemical program to reduce internal corrosion. If a flowline is found to lack integrity, Crestone will investigate, report, and remediate any spills in accordance with the 900 series rules.

Description of Integrity Management Program

Crestone flowlines are pressure tested prior to placing flowlines into service. Flowlines are tested on an annual basis in accordance with COGCC 1104 series rules. If a flowline is found to lack integrity, Crestone will investigate the root cause, as well as report and remediate any spills in accordance with the 900 series rules. All repairs will be completed in accordance with COGCC 1102 Series rules.

Description of the construction method used for public by-ways, road crossings, sensitive wildlife habitats, sensitive areas, and natural and manmade watercourses (i.e., open trench, bored and cased, or bored only), if applicable.

OFF LOCATION FLOWLINE Abandonment Verification

Date: 01/11/2024

Abandonment Verification

The abandoned Off-Location Flowline was located within the jurisdiction(s) of the following local government(s).

(No Jurisdiction)

Description of Abandonment Verification:

The flowline serving the Aristocrat Angus 32-4 (05-123-09333) and Aristocrat Angus 32-4C (05-123-16573) was originally scheduled to be removed. At the time of removal, it was determined that a segment of this flowline running through the active facility would need to be abandoned in places per Rule 1105.e. The other segment was removed via the open trench method. The trench was backfilled and the land surface graded. See attached exhibit for layout drawing and third party abandonment in place verification.

Date: 01/11/2024

Abandonment Verification

The abandoned Off-Location Flowline was located within the jurisdiction(s) of the following local government(s).
(No Jurisdiction)

Description of Abandonment Verification:

The flowline serving the Aristocrat Angus 4-2-4 (05-123-30819) was removed in its entirety via the open trench method. The trench was backfilled and the land surface graded.

OPERATOR COMMENTS AND SUBMITTAL

Comments

Form 44 filed to report POST-ABANDONMENT verification.

The following flowline was partially abandoned in place:

12309333,12316573_FL: serviced Aristocrat Angus 32-4 (05-123-09333), Aristocrat Angus 32-4C (05-123-16573)

Pressure test attached.

Third party verification attached.

The 12309333,12316573_FL: was partially abandoned in place and does not have any associated spill/releases reported on a Form 19.

The following flowlines were removed:

12316573FL: serviced Aristocrat Angus 32-4C (05-123-16573)

12330819FL: serviced Aristocrat Angus 4-2-4 (05-123-30819)

Updated GIS data attached.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
