## Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Due to data alterations beyond the reasonable control of KMOG, KMOG will be conducting soil resampling on the projects listed in the attached Project List document.

The soil samples will be collected by hand auguring in the same location and to the same depth the sample with the altered data was taken. The sample will be analyzed for only the altered constituent(s). Should refusal be met with hand auguring; alternative mechanical means will be utilized to achieve a sample from the same location and depth as the original sample. Additionally, on most locations additional background samples will be collected and analyzed for the altered constituent(s). The resampling will begin the week of December 9th. Based on analytical results, the next steps will be proposed in supplemental workplans submitted under each individual Remediation Project Number.

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

- ☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Describe how source is to be removed.

If a suspected release is identified and confirmed through soil screening and/or laboratory analysis, soils will be removed and transported to a licensed disposal facility. Disposal records will be kept on file and available upon request.

**REMEDIAL ACTION SUMMARY**

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Potential impacts that meet the criteria in Rule 912.b. will be reported to the Director in accordance with that Rule and a site-specific soil and/or groundwater remediation plan will be developed and submitted to the EPMC via a supplemental Form 27 in accordance with Rule 913. If reportable impacts are not encountered, a supplemental Form 27 requesting closure will be submitted within 90 days following completion of sampling activities. Field screening and applicable laboratory analytical results will be reported in all submittals. E&P waste records of material transported off-site are kept on file and available upon request.

### Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).

If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

KMOG has sufficient insurance and bonding to fully address the anticipated costs of Remediation, including the remaining estimated costs for this project. KMOG currently has over 40 million in bonds with the Colorado Oil and Gas Conservation Commission. The cost for remediation is a preliminary estimate only, costs may change upwards or downward based on site-specific information. KMOG makes no representation or guarantees as to the accuracy of the preliminary estimate.

Operator anticipates the remaining cost for this project to be: \$

# RECLAMATION PLAN

## RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

The site will be reclaimed in accordance with ECMC 1000 Series Reclamation Rules.

Is the described reclamation complete? \_\_\_\_\_

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

☐ Interim ☐ Final

Did the Surface Owner provide the seed mix? \_\_\_\_\_

If YES, does the seed mix comply with local soil conservation district recommendations? \_\_\_\_\_

Did the local soil conservation district provide the seed mix? \_\_\_\_\_

## SITE RECLAMATION DATES

Proposed date of commencement of Reclamation. \_\_\_\_\_

Proposed date of completion of Reclamation. \_\_\_\_\_

## IMPLEMENTATION SCHEDULE

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

## PRIOR DATES

Date of Surface Owner notification/consultation, if required. 11/26/2024

Actual Spill or Release date, or date of discovery. \_\_\_\_\_

## SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). 12/09/2024

Proposed site investigation commencement. \_\_\_\_\_

Proposed completion of site investigation. \_\_\_\_\_

## REMEDIAL ACTION DATES

Proposed start date of Remediation. \_\_\_\_\_

Proposed date of completion of Remediation. \_\_\_\_\_

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

☐ Change from approved implementation schedule per Rule 913.d.(2).

## **OPERATOR COMMENT**

Due to data alterations beyond the reasonable control of KMOG, KMOG will be conducting soil resampling on the projects listed in the attached Project List document.

The soil samples will be collected by hand auguring in the same location and to the same depth the sample with the altered data was taken. The sample will be analyzed for only the altered constituent(s). Should refusal be met with hand auguring; alternative mechanical means will be utilized to achieve a sample from the same location and depth as the original sample. Additionally, on most locations additional background samples will be collected and analyzed for the altered constituent(s). The resampling will begin the week of December 9th. Based on analytical results, the next steps will be proposed in supplemental workplans submitted under each individual Remediation Project Number.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.

## **COA Type**

## **Description**

	Upon receipt and submittal to ECMC of laboratory data from this investigation, Operator may request closure of this Remediation Project, even if some of the data affected sites will have ongoing investigation and remediation work. When making the closure request, Operator will update the project list with document numbers of Forms 27 submitted for each site.
	Operator will provide ECMC with an up to date schedule of resampling locations at ECMC request to facilitate onsite oversight and split sampling. Operator will provide contact information for the Operator's field team to facilitate coordination with ECMC Staff.
	When reporting the analytical results for the Remediation Projects described in this Form 27 Initial, Operator will identify and highlight in text, tables, and figures the previously altered data and include unaltered original lab reports, as well as document the resampling results.
	ECMC reserves the right to require additional site investigation and remediation based on its review of site specific data for any of the listed projects as necessary to satisfy the requirements of Rule 913 and 915.
	Approval of this Form 27 Initial, provides the Director's authorization to Kerr McGee to proceed with Site Investigation at multiple open and previously closed Remediation Project sites to address altered laboratory data reports filed with the Commission. Approval of this workplan does not relieve Kerr McGee of its responsibility to comply with ECMC rules during the proposed work or at the affected sites.
