General Comment:

On 11/12/2024, Western Reclamation Work Lead Trujillo conducted an inspection at Laramie Energy LLC's Nichols 24-06A Pad Location in Mesa County, Colorado.

The following compliance issues were observed during this inspection:

- Loadlines missing cap/plug
- Weeds

Due to technical difficulties, inspector was unable to submit this inspection report within an appropriate timeframe- Operator was provided notice of the compliance issues and corrective action requirements in an email on 11/15/2024.

Refer to the Location, Reclamation and Stormwater sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspection that have not been addressed are still applicable.

1003 f. Weeds Noxious weeds? F

Comment Limited inspection due to snow cover. Location has been reduced to areas necessary for production. Vegetation that was observable is predominantly desirable perennial species that appears to be progressing towards 1003 revegetation standards

Noxious weeds (Canada thistle, Bull thistle) were observed established within the interim areas of the Location. However, due to winter dormancy, effective weed management efforts will likely not be achievable until the 2025 growing season. Therefore a longer CA date of 6/1/2025 to comply with Rules 1003.f and 606.c is being provided.
