Inspection Photos

Photo 2. Facing southwest toward the location.

Inspection Photos

Photo 3. The erosion gully along the cut slope has been repaired.

Inspection Photos

Photo 4. There is a run-on swale above the location that has been graded to promote stormwater away from the cut slope.

Inspection Photos

Photo 5. Facing toward the erosion repair. It appears the excavator teeth were dragged downhill along the slope which will promote erosion. Tracking or grading should be performed perpendicular to the slope to prevent erosion.
