Specify: _____

Has the subject Spill/Release been controlled at the time of reporting? Yes

Land Use:

Current Land Use: OTHER Other(Specify): _____
 Weather Condition: Clear
 Surface Owner: FEE Other(Specify): _____

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

While pumping water ahead of the second cement plug, something worked loose in the 7" & 4 1/2" annulus allowing ~5 bbls of fluid (mostly oil) to come to surface and go through a previously undetected split in the welded plate that was between the 7" & 4 1/2" casing strings, resulting in the spill. The spill was immediately contained by earthen berms until a hydrovac and backhoe could be mobilized to start the cleanup. Oil booms will be placed around the area that was impacted until the P&A operations are complete. At that point the P&A equipment (rig & related equipment) will be moved off location and any remnants of the spill will be removed.
