Reclamation - Storm Water - Pit

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: There was worked performed at the location for stormwater management however, the BMP's installed are insufficient. There is erosion beginning to occur where soils were pushed out to fill in the previous erosion gully at the northwest side. The existing vegetation was disturbed and loose soils are susceptible to erosion. The hydro-mulch used in this area was clumped and did not provide sufficient coverage. The erosion along the access road was not stabilized with sufficient BMP's. The were two small rock check dams along this area which are insufficiently sized or constructed. Additional installation of BMP's will need to be installed including reseeding.

Corrective Action: Install or repair required BMPs per Rule 1002.f.(2)C

Date:

Pits: ☒ NO SURFACE INDICATION OF PIT
