COMMENTS:

This well had a bradenhead test conducted 10/22/2024 (Form 17 doc# 403973256) reported 220 psi. After diagnostics were conducted on this well's bradenhead, it was determined that the pressure requires mitigation. Crestone Peak will implement a mitigation plan where a fugitive gas destruction device is set at the wellhead to drawdown the Bradenhead pressure for 6 months. At the conclusion of 6 months Crestone Peak will compile pressure and test data, draw conclusions on the success of the mitigation, and determine future plans.
