COMMENTS:

Operator would like to commission a bradenhead pressure abatement system that combusts bradenhead gas via VRU system with bradenhead gas routed to a working tank to keep pressure below 50 psi threshold. Chevron will perform fluid pulls if needed to relieve pressure until abatement system is in place. Chevron will maintain pressure below the threshold using a pressure abatement system. We will monitor and use this system for a period of 6 months. At the end of the 6 months, we will perform an additional Form 17 and a Form 4 follow-up will be submitted.
