Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Laboratory analytical data indicated a historical release was discovered at the flowline directional change during the Spike State CC30-18 flowline decommissioning. Two soil samples from the same flowline trench exceeded ECMC standards. FL01-08, and FL02-06, exceeded ECMC standards for naphthalene at 0.015 mg/kg, benzo(a)anthracene at 0.115 mg/kg and 0.0161 mg/kg, 1-methylnaphthalene at 0.0074 mg/kg. This location lies within the Pronghorn Winter Concentration High Priority Habitat. A supplemental Form 27 has been submitted for remediation project number 26849 detailing the remedial site plan, document number: 403956108.

CORRECTIVE ACTIONS

#1 Supplemental Report Date: 12/26/2024

Root Cause of Spill/Release Unknown (Historical)

Other (specify) _____

Type of Equipment at Point of Spill/Release: Wellhead Line

If "Other" selected above, specify or describe here:

Describe Incident & Root Cause (include specific equipment and point of failure)

Historical impacts were discovered during flowline decommissioning activities along the flowline where the area is most likely to be impacted. Due to the historical nature of the release, an exact cause was not able to be identified.

Describe measures taken to prevent the problem(s) from reoccurring:

Noble conducts routine AVO inspections of all oil and gas flowlines in order to identify and mitigate potential releases. Further, this flowline is no longer active and is in the process of being decommissioned. The flowline has been taken out of service and there is no longer a possibility of a release originating from this infrastructure.

Disposition of Excavated Soil (attach documentation) Offsite Disposal Onsite Treatment
 Other (specify) _____

Volume of Impacted Ground Water Removed (bbls): 0

Volume of Impacted Surface Water Removed (bbls): 0

REQUEST FOR CLOSURE

Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.

- Basis for Closure:
- Corrective Actions Completed (documentation attached, check all that apply)
 - Horizontal and Vertical extents of impacts have been delineated.
