**Description**

**Operator Comments:**

SWS has dramatically reduced the proposed operational equipment planned for the Weitzel #1 SWD site. The original, 2014 plan for the Location contemplated 45 storage tanks, two containment buildings for pumping, and various injection equipment. Under SWS' revised proposal, the Location would not house any tanks, pumping or injection equipment. Equipment would be limited to the proposed wellhead connection and the 12x12' shed/portico over the wellhead connection.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
