Comment:

This location does not comply with Rule 1004. Reclamation rules require reclamation activities to be conducted within twelve months of plugging on non-cropland; Well was plugged 11/07/2011. At the time of this inspection, it was observed that the former access road does not appear to have been graded/contoured to match surrounding topography with ruts evident throughout portions of the road. Additionally, undesirable vegetation (e.g. kochia, russian thistle) was observed throughout the fenced portions of the reclaimed area, though some desirable species were also noted. Additional reclamation activities are required to grade and/or contour the access road and establish desirable perennial vegetation throughout the former location.

Corrective Action:

Comply with Rule 1004. Reclaim access road and reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.
