Good morning Arend,

As a part of some of our upcoming oil and gas activity, we are going to have to re-enter the three wells attached. This is needing to be done by end of May I believe.

I wanted to jump on this early and reach out to you so that we could try and work around any sort of timing constraints you may have and see if we needed to jump on these sooner rather than later.

Again, this is not a preference and we have to get on these wells. I will follow up with a phone call to discuss with you.
