### **SELECT CHEMISTRY LLC**

#### **PFR-465**

**The entity holding the trade secret information has not disclosed the information to any other person, other than a member of a local emergency planning committee, an officer or employee of the United States or a state or local government, an employee of such person, or a person who is bound by a confidentiality agreement, and such person has taken reasonable measures to protect the confidentiality of such information and intends to continue to take such measures, or disclosure has otherwise been limited such that the information is not readily available to competitors.**

PFR-465 is an anionic friction reducer product, the disclosure of which would cause competitive harm to Select Chemistry LLC. Specifically, such disclosure would permit competitors to determine the precise chemical identity and composition of this product. The product has been reviewed carefully to ensure that only the components that represent trade secret components are protected. To Select Chemistry's and Select Chemistry's knowledge, the confidential information (including the chemical name and CAS number) do not appear in any public source. In addition, this information has not been previously disclosed on the FracFocus database by Select Chemistry LLC or, to Select Chemistry's knowledge, any other third party.

Specifically, the identity of the confidential information and its use in PFR-465 has not been publicly disclosed to our knowledge: (i) pursuant to any federal, state, or local law or regulation; (ii) in any professional trade publication; or (iii) through any other media or publications available to the public or Select Chemistry's competitors.
