The well is located 680 ft. (N) of South line and 1980 ft. (E) of East line. (S) (W)

The elevation above sea level is 6247 ft.

Details of Plan of Work: (State names of and expected depths to objective sands; Show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

Rotary tools on casing approximately 100 feet. 10.3/4 surface pipe cemented to surface. Oil strain to production.

This location is just a few feet from the cable tool drilled on Carlos Sandoval No. 2. We deemed it prudent and economical to start new hole with rotary rig.

Sandoval No. 2 properly plugged and consider this as active location.
