Commission**

Department of Natural Resources

## Inspection Photos

**Photo 1.** Facing east at the location. There was a leak at the wellhead that had just occurred. The leak misted off the location which will require the spil to be reported and properly cleaned up.

Loc:321579 | Date: 1/28/2025

## Inspection Photos

**Photo 5.** Standing at the approximate end of the stained grass which was 375' from the wellhead.

## Inspection Photos

**Photo 6.** Standing at the approximate end of the stained grass which was 375' from the wellhead.

## Inspection Photos

**Photo 7.** Inside the engine shed. It appears the leak was repaired. There is fresh sand in this area and it is presumed that oily waste was cleaned up.
