COMMENTS:

On 12/9/2024 a Form 17 was completed. The Form 17 had a starting pressure of 70 psi and an ending pressure of 0 psi. Gas was present at the start of the test but was not continuous. Following the Form 17, the well was opened to abatement to manage BH pressure, the abatement system is controlled and bradenhead gas is not vented. The abatement system will remain on location for the next 12 months and continue to be used as a mitigation strategy to maintain bradenhead pressures below the 50-psi threshold. Chevron will perform another Form 17 test on or by 12/9/2025 and a follow up Form 4 will be submitted to the ECMC.
