Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Pursuant to ECMC Rule 911 a site investigation was conducted pertaining to the MEYER USX CC07-17 wellhead cut and cap and flowline removal. The wellhead was cut and capped per ECMC rules. Approximately 210' of flowline was removed. Previously, two (2) grab soil samples were collected at the wellhead excavation (1) and flowline terminus at the wellhead (1). Additionally, soil samples were field screened at the N-E-S-W sides of the wellhead. One (1) soil sample was collected at the flowline terminus at the separator during the facility decommissioning assessment and was reported under Rem. # 31834 (Form 27 Document Number 403679058). Soil samples were analyzed by a certified laboratory for the full extent of Table 915-1, EC, SAR, pH, metals, and boron. All samples collected were analyzed by a certified laboratory using approved ECMC laboratory analysis methods.
