Comment:

<p>After reviewing the Operator supplied drone imagery, it does not appear that the entire access road has been reclaimed. The drone closure report states that the wellhead was accessed from a 95' long two track access road. However, upon review of historical imagery it does not appear that the entire extent of the access road was preexisting and indicates that the access road is close to approximately 1400' in length. The access road appears to still be in use as an irrigation maintenance road, therefore, an approved variance is required or the access road will need to be reclaimed. Refer to attached inspection photos.</p>	
Corrective Action:	<p>Comply with Rule 1004 to reclaim access road.</p>
