General Comment:

On 1/31/25 ECMC staff, Kris Neidel inspected the spill at the Powder Wash Camp Lateral 118. Weather was 25 degrees and partly sunny at the time of inspection, ground was mostly frozen. The following was observed; partial snow cover, the section of pipe that failed was removed and pipe was repaired by welding in a new segment of pipe, the excavation was still open and pipe exposed, it was reported that the line gathers gas from the field. Corrective actions: demonstrated remaining soils are compliant with Table 915-1. See attached photos.
