**General Comment:**

ECMC Inspection Report Summary  
On Wednesday 2/19/2025, I, Inspector Scott Ramsey, conducted a routine inspection/audit at Caerus A33NW, at Location # 323850 in Garfield county Colorado.  
Any Corrective Actions from previous Inspections that have not been addressed are still applicable.  
While there, I observed normal operations. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management Area. Operator (Caerus) has provided documentation of their Best Management Practices for Sediment Tracking Controls.

During this inspection the following compliance issues were observed:  
1. Location is snow covered but signs of lack of stabilization are evident.  
Refer to photograph of observed compliance issue.

A follow up on this site inspection may be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.

**Reclamation - Storm Water - Pit**

**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
Compaction	Fail					

Comment: 1. Location is snow covered but signs of lack of stabilization are evident. Maintenance relative to storm water runoff, operators shall consider seasonal factors, such as winter snow cover and spring runoff from snowmelt, to ensure site conditions and controls are adequate and in place to effectively manage storm water. Places with sparse to no gravel & light compaction are present on lease road and location. Sparse to no gravel and light compaction could lead to future stabilization and tracking issues.

Corrective Action: **Install, maintain or repair required BMPs**

Date: \_\_\_\_\_

**Pits:**  NO SURFACE INDICATION OF PIT
