Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

A site investigation was conducted pursuant to ECMC Rule 911 at the BARNARD T4N-R65W-S4 L01 Facility and Tank Battery location.

**PROPOSED SAMPLING PLAN**

**Proposed Soil Sampling**

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Grab confirmation soil samples were collected from the produced water vessel(s) excavation, beneath the ground oil tank(s), and at the risers for the flowline(s) and dumpline(s) of any separator(s). Soil samples were analyzed by a certified laboratory for TPH (total volatile [C6-C10] and extractable [C10-C36] hydrocarbons), organic compounds in soil per ECMC Table 915-1, and EC, SAR, pH, and boron. All samples collected were analyzed by a certified laboratory using approved ECMC laboratory analysis methods.

**Proposed Groundwater Sampling**

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered during additional site assessment activities, a grab groundwater sample will be collected and analyzed for all organic compounds and inorganic parameters per Table 915-1.

**Proposed Surface Water Sampling**

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

[Empty box for surface water sampling details]

**Additional Investigative Actions**

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

Visual inspection of the tank battery area occurred during abandonment activities. Field personnel field screened all disturbed areas using a PID, visual, and olfactory senses to determine if laboratory confirmation sampling was required. The ECMC Tank Battery and Produced Water Vessel Closure Checklists were utilized and filled out during the abandonment process. A photolog was attached.

Is further site investigation required?

Elevated metals were observed in discrete location at the former BARNARD T4N-R65W-S4 L01 Tank Battery. Soil will be resampled and analyzed for the full Table 915-1 analyte suite at the SEP DL 3' sample locations at the same depth where the initial elevated concentrations were observed. Additional background samples will be collected to further characterize native soil conditions. Noble will request an NFA be granted if the reanalyzed samples comply with the Table 915-1 concentration standard. Background samples will be used to justify elevated concentrations.

Alternatively, if the sample results exceed the Table 915-1 standards and cannot be attributed to native soil conditions via background soil characterization a minimum of five additional samples will be collected to delineate the magnitude and extent of elevated constituents.

This form serves to comply with the Rule 913.e. reporting schedule. The Operator will complete the additional site investigation as outlined in this proposed Site Investigation Report workplan prior to the Proposed completion of site investigation date detailed in the Implementation schedule.

Additionally, the operator would like to bring to the attention of the ECMC that the separator flowline riser tie-in samples for the Barnard 4-23 (REM #: 30822) and Barnard 4-22 (REM #: 20102) to the BARNARD T4N-R65W-S4 L01 tank battery were performed under those flowline's affiliated remediation numbers (20102 & 30822). The Barnard 4-22 did receive an NFA designation status and the Barnard 4-23 still has ongoing supplemental site investigation actives to be done. Further still, the operator would like to request that any further remedial work in regards to the BARNARD T4N-R65W-S4 L01 tank battery's separator flowline riser tie-ins be consolidated to the Barnard 4-23 remediation #: 30822 and be consider closed on the end of BARNARD T4N-R65W-S4 L01 tank battery remediation number: 28824. Attached in the related forms segment of this report are the most recent supplemental form 27s (Doc #: 403056932 & 403923728) for the Barnard 4-23 and Barnard 4-22 for reference.

Quarterly reporting will be conducted until closure criteria are achieved for the remediation project. The results of the supplemental site investigation will be submitted on a subsequent Form 27.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
