SUNDRY NOTICES AND REPORTS OF WELLS

00048461

(Indicate nature of data by checking below)

Notice of intention to drill	XXX	AJJ	
Notice of intention to change plans		DVR	
Notice of date for test of water shut-off		FJK	
Report on result of test of water shut-off		OPS	
Notice of intention to re-drill or repair well		PHM	
Notice of intention to clean out well		H	
Statement of shooting			
Statement of perforating			
Notice to pull or otherwise alter casing			
Notice of intention to abandon well		JJD	9/11/4
Report of work done on well since previous report			

Following is a (notice of intention to do work) (On land)  
(~~report of work done~~) (patented) described as follows:

Colorado State 500 Morgan County C-55-NE Huey Ranch W.C. Field

1 U.S.A. 33 NE 1/4 2-N 56-W 6+6 PM  
(Well No.) (Lease) (Sec. and 1/4 Sec.) (Twp.) (Range) (Meridian)

The well is located 1980 ft. ~~(N)~~ of North line and 660 ft. ~~(E)~~ of   
(S) (W)

East line of Section 33

The elevation above sea level is \_\_\_\_\_ ft.

Details of Plan of Work: (State names of and expected depths to objective sands: Show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

Top of: Niobrara.....4250'  
Timpas.....4595'  
Bentonite.....4975'  
Dakota "D".....5065'  
Dakota "J".....5150'

The object depth of this well will be 5200' or such other depth as will adequately test the Dakota "J" sand. Using rotary tools throughout the operation, cores will be cut and tests made of all depth intervals of interest.

Casing program will be thus: approximately 100' of surface casing (10-3/4") being set and cemented with about 125 sacks. If the well appears productive, 5 1/2" casing will be run and set into the producing zone. 150-75 sacks of cement will be used to secure same. Mud used will be controlled to such densities as is necessary to overcome hydrostatic pressures.

Approved: APR 4 1955
