RLS	
CGM	

The remaining locations referred to in your letter of May 14, 1981 have not been drilled. Five of these locations were within the Wilderness Study Area and drilling was not allowed by the federal government. The WSA has now been dropped and we are evaluating the entire area for further development.

I am also enclosing a copy of the Sundry Notice on the V-20-2. This well location and number previously was the V-16-1 Federal SW SW 16-14S-96W.

Jim, thanks for all your help.

Very truly yours,

Elaine Johnson
