Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECOM is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

OPERATOR INFORMATION

- ☐ Pit Bottoms
- ☐ Other (as described by EPA) _____

DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
No	GROUNDWATER	N/A	Not encountered
Yes	SOILS	400' x 400'	Laboratory analysis

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

This Form 27S is being submitted to meet the 90 day reporting; Form 27S (Document #403986407) is in process pending approval. Boron sampling performed 4/4/2024 revealed that seven of the eight samples collected below the berms remained below the ECMC Boron standard of 2mg/l and the one sample that exceeded the standard was collected at the EPSS location at a depth of 4' bgs. The EPSS sample collected at 6' bgs exhibited concentrations below the standard.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Based on sample results, excavation of sodic soils to place in the treatment area would include all berm soils and soils below berms to a depth of 6' bgs where Soil Suitability results remain below standards. Once the treatment area is established, quarterly sampling for pH, EC, Boron, and SAR will continue to identify any Boron exceedance within the treatment area.

Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

If groundwater is encountered during the site assessment, a grab groundwater sample will be collected and analyzed for all organic compounds per ECMC Table 915-1.

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan (summary):

SITE INVESTIGATION REPORT

SAMPLE SUMMARY

Soil

Number of soil samples collected 62

Number of soil samples exceeding 915-1 12

NA / ND

ND Highest concentration of TPH (mg/kg) _____

_____ Highest concentration of SAR _____

Was the areal and vertical extent of soil contamination delineated? No

BTEX > 915-1 No

Approximate areal extent (square feet) 100

Vertical Extent > 915-1 (in feet) 22

Groundwater

Number of groundwater samples collected 0

NA Highest concentration of Benzene (µg/l)

Was extent of groundwater contaminated delineated? No

NA Highest concentration of Toluene (µg/l)

Depth to groundwater (below ground surface, in feet)

NA Highest concentration of Ethylbenzene (µg/l)

Number of groundwater monitoring wells installed

NA Highest concentration of Xylene (µg/l)

Number of groundwater samples exceeding 915-1

NA Highest concentration of Methane (mg/l)

Surface Water

0 Number of surface water samples collected

Number of surface water samples exceeding 915-1

If surface water is impacted, other agency notification may be required.

OTHER INVESTIGATION INFORMATION

☐ Were impacts to adjacent property or offsite impacts identified?

☒ Were background samples collected as part of this site investigation?

5 Background samples were taken on 8/1/2023 for metals (BM1, BM2, BM3, BM4, BM5). Previously, two Background samples were collected 12/18/2021 (Background North, and Background South).

☒ Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) 647

Volume of liquid waste (barrels) 0

☐ Is further site investigation required?

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? Yes

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Pit excavation of hydrocarbon impacted soil was removed and disposed of a Pawnee Waste facility. ~107 cu yds of soil was removed and disposed of, waste manifest attached in remedial report summary. See attached Remedial Action Plan for additional details.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Operator submitted Form 27S (Document #403986407), which is currently in process pending approval; this was to address the COA in Form 27S (Document #403876280). Based on conversations with ECMC EPS Krystal Heibel in November 2024, the remediation of soils exhibiting high pH, EC, and / or SAR by placing gypsum in the landfarm was approved. Remedial Plan for 2Q 2025 includes collecting an exchangeable sodium percentage (ESP) sample. ESP is a measurement of the amount of sodium in a soil relative to the total capacity of the soil to exchange cations. ESP is used to classify soils as saline or alkali, and to determine if there is a sodium hazard. ESP results will be used to determine the adequate gypsum quantity to be applied to the landfarm soils. Any soils exhibiting high pH, EC, and / or SAR will be treated by applying gypsum in the landfarm and tiling with heavy machinery. Quarterly sampling will be conducted and analyzed for Boron, EC, pH and SAR to monitor the progress of the treatment. If Boron is present above standard, the impacted soils will be removed for disposal at Pawnee Waste Facility. The landfarm area will be monitored for control of noxious weeds. Silt fence and soil berm BMPs have been established to prevent run off. Soils that exhibit concentrations below Table 915 Soil suitability will be returned to farming. Following completion of treatment and removal of treated soils, confirmation sampling will be conducted and analyzed for Soil Suitability for Reclamation to confirm that impacts are no longer present within the landfarm footprint.

Soil Remediation Summary

☒ In Situ

PERIODIC REPORTING

Approved Reporting Schedule:

☒ Quarterly☐ Semi-Annually☐ Annually☐ Other

☐ Request Alternative Reporting Schedule:

☐ Semi-Annually☐ Annually☐ Other

Rule 913.e:

After initial approval of a Form 27, the Operator will provide quarterly update reports in a Supplemental Form 27 to document progress of site investigation and remediation, unless an alternative reporting schedule has been requested by the Operator and approved by the Director. The Director may request a more frequent reporting schedule based on site-specific conditions.

Report Type:

☐ Groundwater Monitoring☐ Land Treatment Progress Report☐ O&M Report☒ Other Remediation progress update

Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).

If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

Operator is bonded per rule 702 and complies with GL Insurance per Rule 705

Operator anticipates the remaining cost for this project to be: \$ 10000

WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? Yes

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

Contaminated Soil was disposed of at Pawnee Waste Facility

Volume of E&P Waste (solid) in cubic yards 647

E&P waste (solid) description contaminated soil

ECMC Disposal Facility ID #, if applicable:

Non-ECMC Disposal Facility: Pawnee Waste

Volume of E&P Waste (liquid) in barrels 0

E&P waste (liquid) description

ECMC Disposal Facility ID #, if applicable:

Non-ECMC Disposal Facility:

REMEDATION COMPLETION REPORT

REMEDATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No

If YES:

☐ Compliant with Rule 913.h.(1).

☐ Compliant with Rule 913.h.(2).

☐ Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards? No

Does the previous reply indicate consideration of background concentrations?

Does Groundwater meet Table 915-1 standards?

Is additional groundwater monitoring to be conducted? _____

Operator shall comply with the ECMC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Based on conversations with ECMC EPS Krystal Heibel in November 2024, the remediation of soils exhibiting high pH, EC, and / or SAR by placing gypsum in the landfarm was approved. Remedial Plan for 2Q 2025 includes collecting an exchangeable sodium percentage (ESP) sample. ESP is a measurement of the amount of sodium in a soil relative to the total capacity of the soil to exchange cations. ESP is used to classify soils as saline or alkali, and to determine if there is a sodium hazard. ESP results will be used to determine the adequate gypsum quantity to be applied to the landfarm soils. Any soils exhibiting high pH, EC, and / or SAR will be treated by applying gypsum in the landfarm and tiling with heavy machinery. Quarterly sampling will be conducted and analyzed for Boron, EC, pH and SAR to monitor the progress of the treatment. If Boron is present above standard, the impacted soils will be removed for disposal at Pawnee Waste Facility. The landfarm area will be monitored for control of noxious weeds. Silt fence and soil berm BMPs have been established to prevent run off. Soils that exhibit concentrations below Table 915 Soil suitability will be returned to farming. Following completion of treatment and removal of treated soils, confirmation sampling will be conducted and analyzed for Soil Suitability for Reclamation to confirm that impacts are no longer present within the landfarm footprint.

Is the described reclamation complete? No

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

☐ Interim ☐ Final

Did the Surface Owner provide the seed mix? _____

If YES, does the seed mix comply with local soil conservation district recommendations? _____

Did the local soil conservation district provide the seed mix? _____

SITE RECLAMATION DATES

Proposed date of commencement of Reclamation. 09/01/2025

Proposed date of completion of Reclamation. 12/01/2025

IMPLEMENTATION SCHEDULE

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

PRIOR DATES

Date of Surface Owner notification/consultation, if required. 09/15/2023

Actual Spill or Release date, or date of discovery. 02/25/2020

SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). 08/02/2021

Proposed site investigation commencement. 08/02/2021

Proposed completion of site investigation. 04/04/2024

REMEDIAL ACTION DATES

Proposed start date of Remediation. 05/01/2023

Proposed date of completion of Remediation. 09/01/2025

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

☐ Change from approved implementation schedule per Rule 913.d.(2).

Basis for change in implementation schedule:
