Compaction	Fail					Lack of stabilization
Other	Fail					Insufficient tracking BMPs

Comment:

1) Insufficient erosion control; sediment has eroded onto location behind separator and dehydrator units.
 2) Location surface and lease road lack stabilization with insufficient vehicle tracking BMPs in place to minimize transportation of sediment. Operator has posted an administrative control sign at entrance to location as a BMP. Control is not being followed. Rutting on lease road and location were observed prior to location audit.

Corrective Action:

1002.f.(2): Oil and gas operators shall implement and maintain Best Management Practices (BMPs) at all oil and gas locations to control Stormwater runoff in a manner that minimizes erosion, transport of sediment offsite, and site degradation. BMPs shall be maintained until the facility is abandoned and final reclamation is achieved pursuant to Rule 1004.
